

TRANSFER SYSTEMS

Custom Automatic Transfer Switches for Critical Uptime

Engineering the transfer switch around the facility - not the catalog.

THE ENGINEERING POINT

Selection should follow the facility sequence - not just amperage.

WHAT YOU'LL TAKE AWAY

1

Choose the transition

Match open, delayed, or closed transition to the loads and operating sequence.

2

Design for maintainability

Use bypass isolation where critical loads cannot tolerate a service outage.

3

Coordinate the whole chain

Align ATS controls with generators, UPS systems, protection, and monitoring.

BUILT FOR Owners • Engineers • EPCs • Contractors
