

SERVER ROOM POWER

Custom Power Distribution Units for Server Rooms

A server-room PDU should fit the actual branch circuit mix, monitoring needs, redundancy strategy, and physical...

THE ENGINEERING POINT

Engineering decisions made early prevent expensive field problems later.

WHAT YOU'LL TAKE AWAY

1

Design the branch architecture

Coordinate input source, transformer needs, panelboards, breaker mix, and downstream loads.

2

Add useful visibility

Integrate metering and communications where operators need actionable load data.

3

Plan for change

Reserve space, capacity, labeling, and access for inevitable IT moves, adds, and changes.

BUILT FOR IT Facilities • Data Centers • Electrical Engineers
